

Shakidul Islam Shakil

Full Stack Software Engineer at Tech Element IT LTD
+8801761043883 | shakidul31@gmail.com | [Portfolio](#) | [Github](#) | [Linkedin](#)

Professional Summary

Full Stack Software Engineer with 3+ years of hands-on experience building scalable web applications using TypeScript, Next.js, Node.js (Express.js), MySQL, PostgreSQL, and MongoDB. Proficient in designing RESTful APIs, implementing TDD, and developing accessible, high-performance applications. Experienced with Azure DevOps, CI/CD, and Agile development, with a proven ability to quickly adapt, collaborate effectively, and deliver high-quality software on schedule.

Skills

Frontend: Next.js, Typescript, Redux, React Query, TailwindCSS, Webpack, Shadcn, Stripe, Webpack, PWA, Framer motion, Vite, SWR, HTML
Backend: Node.js, Express.js, Mongoose, MySql, Sequelize, JWT, Microservice, PostgreSQL, Prisma, Docker, Socket.io, SSLCommerz
Tools: Git, VS Code, Azure, DevOps, Postman, Figma
Other Skills: RESTful APIs, CI/CD Pipelines, TDD, Cross-Browser Compatibility, Agile Development

Experience

Full Stack Software Engineer December 2024 - Present
Tech Element IT LTD

- Designed and implemented responsive user interfaces using Next.js (App Router) for a Bangladesh-based client, ensuring WCAG compliance and improved usability.
- Applied Test-Driven Development (TDD), maintained code quality with Prettier, leveraged Azure DevOps (ADO) and Agile, and streamlined integration, testing, and deployment with cPanel (cloud hosting).
- Improved application performance by building reusable components, optimizing state management with Redux and SWR, and enhancing user experience with Framer Motion.
- Implemented secure authentication using JWT, bcrypt.js, and rate limiting, while ensuring responsive, cross-device compatibility with Tailwind CSS and Bootstrap. Optimized PostgreSQL and MySQL queries using Prisma ORM and indexing, and created technical documentation while leading workshops on Next.js best practices to improve team efficiency.

Full Stack Software Engineer August 2023 - September 2024
Bangladeshi Software

- Built responsive and accessible user interfaces with Next.js (App Router), ensuring WCAG compliance and improved usability.
- Applied TDD, maintained code quality with Prettier, collaborated using Azure DevOps and Agile, and streamlined integration, testing, and deployment with cPanel. Contributed technical documentation and Next.js best practices to improve team productivity
- Improved performance by building reusable components, optimizing state management with Redux and SWR, and enhancing UI with Framer Motion. Implemented secure authentication using JWT, bcrypt.js, and rate limiting, while ensuring responsive, cross-device experiences with Tailwind CSS and Bootstrap. Optimized PostgreSQL and MySQL queries using Prisma ORM and indexing.

Frontend Engineer 6 July 2022 – 6 September 2022
Translense Pvt Ltd | Delhi | India

- Complete intensive training in Next.js(SSR), Typescript and advanced frontend technologies gaining proficiency in Frontend development.
- Integrate APIs made with the backend team for the organizations called Ordiyo. (The name of the project)
- Optimized Progressive Web Applications (PWAs) to enhance performance, offline accessibility and seamless user experiences.
- Implemented secure and efficient authentication via Login/Signup APIs, including OAuth integration with Google, GitHub, and Facebook.
- Consumed RESTful APIs (built with Sequelize) to fetch and display data efficiently in the frontend.

Projects

ISP Billing & Network Management System | Next.js, Typescript, Mikrotik, Express.js, MySql, REST API [Live Link](#)

- Credentials: Email: **systechbdi@gmail.com** Password: **Imrul@1989**
- Developed a complete ISP billing and network management system with MikroTik integration for automated client provisioning and activation. Built role-based Super Admin, Employee, and Client panels with secure authentication and RESTful APIs.
- Implemented client billing, automatic line suspension for unpaid invoices, balance recharge, and admin wallet management.

LinuxEON Bulk SMS Platform | Next.js, Node.js, Express.js, MySQL, REST APIs [Live Link](#)

- Credentials: Email: **shakil@gmail.com** | Password: **123456A**
- Developed a business SMS platform supporting bulk and single SMS campaigns with contact, audience, and campaign management.
- Implemented authentication, message scheduling, delivery reports, and business communication features. Built scalable REST APIs for reliable high-volume SMS delivery.
- Utilized Redux Toolkit for centralized state management, improving frontend performance and predictability.

Enterprise Management System | Next.js, Node.js, Express.js, MySQL [Live Link](#)

- Credentials: Phone: **01922260387** Password: **01922260387**
- Developed an enterprise solution for suppliers and retailers to manage products, inventory, and sales operations. Implemented stock management, financial reports, retailer management, and SMS notifications. Build dashboards and reporting features to simplify business operations.

ISAB Student Portal & Document Management | Next.js, Node.js, Express.js, MySQL [Live Link](#)

- Super Admin Credentials (Press **Ctrl + K**): Phone: **01700000000** Password: **01700000000**
- Developed a student portal for online document submission and academic management. Implemented secure authentication, document verification, application tracking, and role-based access control. Built an efficient workflow for students and administrators to manage academic documents and portal activities.

Educational Qualification

Green University of Bangladesh October 2024 - Present
BSc in CSE (Computer Science and Engineering) CGPA - 3.583/4
